EDUCATION

Bachelor of Science in Computer Science 2022-26

COMSATS University Islamabad - Lahore Campus
CGPA: 3.35

SKILLS

Languages: JavaScript/TypeScript, Python
Frontend: React, React Native (Expo), Redux, React Navigation
Backend: FastAPI, RESTful & WebSocket APIs
Databases/ORMs: PostgreSQL (SQLAlchemy), Qdrant
Practices: MVC, Git/GitHub, UI/UX (Figma)

PROJECTS

ChatCare App | React Native + AI (FYP) | February 2025 – January 2026

- Developed a React Native frontend, implementing Redux for global state management and React Navigation for multi-screen flows.
- Built intuitive UI/UX for AI text & voice chat, mood tracking, session history, caregiver dashboard, and patient onboarding.
- Contributed to backend development using FastAPI, PostgreSQL, Qdrant, LangChain, and Gemini for AI-driven analysis and intelligent responses.
- Implemented conversational and audio pipelines enabling intent detection, emotional insights, stress scoring, and emergency risk checks.
- Helped build a RAG (Retrieval-Augmented Generation) system with structured PDF/TXT ingestion and context-aware LLM responses.
- Added caregiver approval flows, red-flag detection, and safety protocols for high-risk or sensitive recommendations.
- Developed JWT-protected APIs, medication reminder workflows, and automated background jobs for scheduled actions.
- Supported scalable backend architecture using clean service layers and modular design.

Sooqz App | React Native (Freelancing Project) | March 2025 – May 2025

- Expo-based React Native classifieds platform with full REST CRUD, real-time sync & offline caching.
- Used Redux for global state management and message feature through polling
- Notifications through oneSignal, searching feature, and filtering
- Responsive UI that drove higher listing engagement.

SimCorp Web App | React (Freelancing project) | August 2025 – September 2025

- Built a responsive React single-page marketing site with clear IA (Services, Portfolio, About, Contact), sticky CTAs, mobile click-to-call, and a lead-gen form with email alerts.
- Improved performance & accessibility with lazy-loaded, lightweight bundles, semantic markup, and caching for fast first loads.
- Tech & ops: React + React Router, minimal state for UI, form submission via API endpoint, version-controlled deploys with domain/DNS, SSL, and safe update/backups.

ACHIEVEMENTS

🏆 Secured 2nd Position in Final Year Project (FYP) for ChatCare – AI-powered Mental Health Application, BS Computer Science
